Introduction

The SIP is a planning tool designed to address student achievement and system needs identified through the school's comprehensive needs assessment (CNA). Additionally, the SIP provides a method for schools to address the school improvement planning requirements of Public Act 25 of the Revised School Code and the Elementary and Secondary Education Act (ESEA) as applicable.

Improvement Plan Assurance

Introduction

During the 2019-2020 school year, schools will have two options for Goals and Plans. 1. Update Goals and Plans, if necessary, based on analysis of data and Program Evaluation; 2. Complete and upload the Abbreviated Goals and Plans template into ASSIST, based on analysis of data and Program Evaluation.

Strategy 3:

Competency-based, personalized learning system of education - The time for competency education has come. It is vitally important for our country to move away from the restrictions of a time-based system. The reasons are many: To ensure that all students succeed in building college and career readiness, consistent with the Common Core of world class knowledge and skills; To build the capacity of districts, schools and educators to respond more rapidly to the needs of students and engage in continuous improvement; To take advantage of the extraordinary technological advances in online learning for personalization, allowing students to learn at their own pace, any time and everywhere. To provide greater flexibility for students that would otherwise not graduate from high school because they have to work or care for their families. In 2011, 100 innovators in competency education came together for the first time. At that meeting, participants fine-tuned a working definition of high quality competency education:

- Students advance upon mastery.
- Competencies include explicit, measurable, transferable learning standards that empower students.
- Assessment is meaningful and a positive learning experience for students.
- Students receive timely, differentiated support based on their individual learning needs.
- Learning outcomes emphasize competencies that include application and creation of knowledge, along with the development of important skills and dispositions.
